

## **SENIOR TRAFFIC / TRANSPORTATION ENGINEER**

### **THE MOBILITY GROUP**

We are looking for a Senior Traffic/Transportation Engineer to join our team in Irvine in a leadership role. This person should be an experienced professional with a strong background in traffic engineering and operations, and transportation engineering.

They will manage projects, prepare technical studies and documents, direct staff, interact directly with clients, and assist with marketing and business development. They will also be directly involved in responding to the new analytical and evaluation challenges of VMT and autonomous vehicles.

The Mobility Group is a leading Southern California transportation consulting firm in Irvine, California, providing traffic and transportation engineering and planning services to the private and public sectors. We have been in operation for twenty years and have conducted many high profile studies and projects throughout Southern California and the Western US.

Our work includes traffic studies, traffic operations, transportation plans, parking studies and plans, and traffic management. From our philosophy of a problem solving approach, and providing effective and creative transportation solutions, we have built an enviable client base.

This position requires:

- BS or MS in Civil Engineering (transportation emphasis).
- Minimum seven years of increasingly responsible experience in the field.
- California TE or PE registration.
- Strong verbal / writing communication skills.
- Experience with traffic engineering software (Synchro, HCS, Traffix, Vistro, Vissum), and AutoCAD.

The successful candidate will be self-motivated with good problem-solving skills. We encourage creativity and innovation in addressing transportation issues. This position offers opportunities to contribute and make a difference on challenging projects.

We offer very competitive compensation and benefits, including medical/dental plans, life insurance, retirement plan, and profit sharing. Salary is negotiable based on experience and capabilities.
